Presentation Outline

Interoperability

- Why care?
- BIM Promise
- Game Changer

Proprietary Formats

- Autodesk
- Others

Open Specs.

- IFC
- COBie
- gbXML
- CIS 2.1

3C Technology

- Federated Model Tools
- Model Servers

Interoperability

Why care?
BIM Promise
Game Changer

Why Care? Lost Money

2004 NIST report

(Cost Analysis of Inadequate Interoperability in the
U.S. Capital Facilities Industry)

- \$15.8B/y lost due to poor interoperability
 - 1-2% industry's revenue
- 2/3 during operations and maintenance phase

<http://www.bfrl.nist.gov/oae/publications/gcrs/04867.pdf>

Profitability in Construction

% Total Revenue

Statistics Canada 2008: Small and Medium Construction Firms (<\$5M)

<http://www.ic.gc.ca/cis-sic/cis-sic.nsf/IDE/cis-sic23bece.html>

The Promise: Interoperability

http://inside-the-system.typepad.com/my_weblog/bim_discussions/

BIM Definition (Noun)

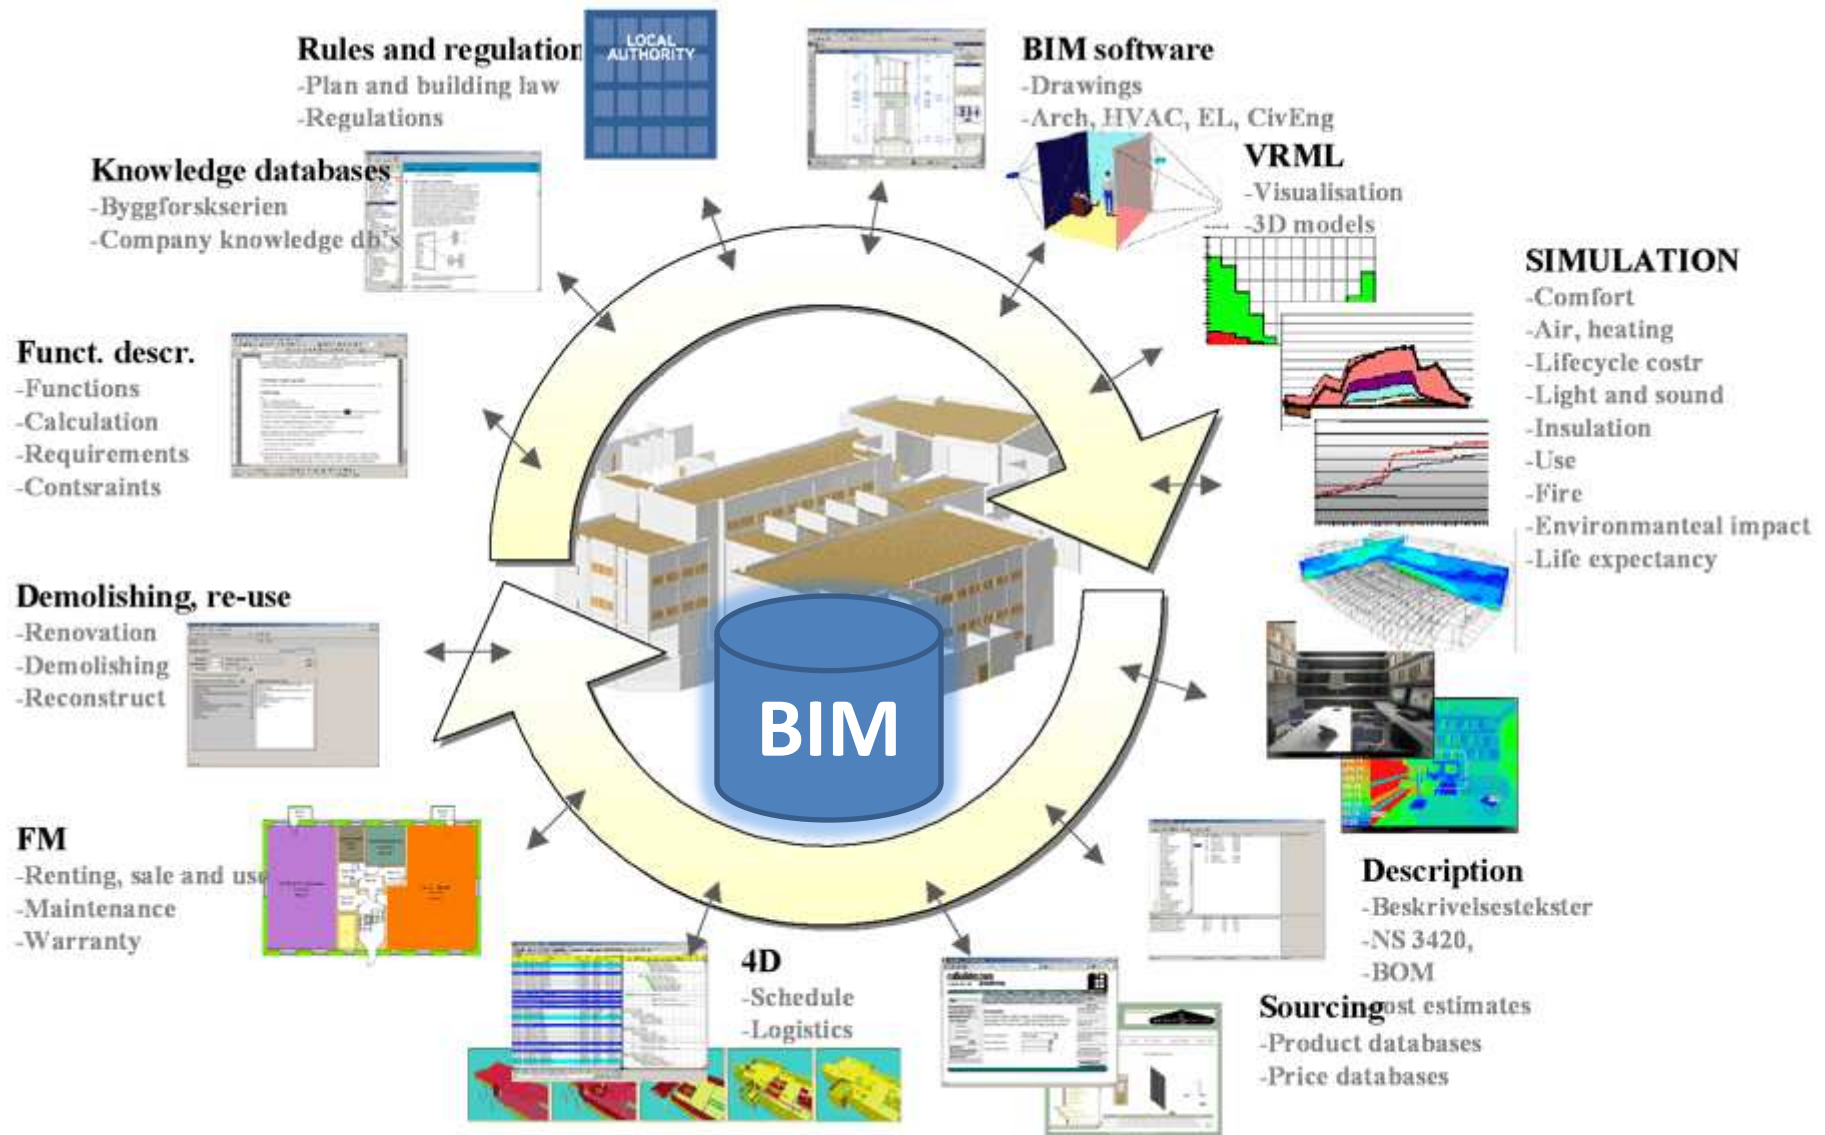

<http://www.buildingsmartalliance.org/index.php/nbims/about/>

A Building Information Model (BIM) is:

- a digital representation of physical and functional characteristics and relationships
- a lifecycle information collection point
- for collaboration by different stakeholders at different phases
- focused on saving resources
 - time, money, materials
- founded on open standards for interoperability

Construction Life-Cycle

Pictures from: Selvaagbygg, DDS, Byggforsk, NBLN University of California, CIFE Stanford, Pythagoras and Oluf Granlund Yo.

05/05/2011

BIM Workshop, Winnipeg - John Dickinson - BIM and the 3 Cs

Potential for Game Changer

- Avoid late changes
 - Miss-understandings, miss-communications, unforeseen consequences
 - Better solutions
 - No missed-opportunities, multi-disciplinary approaches, mutual understanding and consensus
- 
- Less errors/clashes,
 - Correct materials/tools/people at correct time,
 - Offsite work, prefab assemblies

Communication Collaboration Coordination

http://www.cenews.com/magazine-article-cenews.com-october-2008-what_does_bim_mean_for_civil_engineers_-6098.html

Proprietary Formats

Autodesk
Others

Proprietary BIM Formats – Autodesk

DWG – 18 different formats (2009), none publicly documented, RealDWG library licensable, limited metadata – not BIM

DXF – published and maintained, 2D, limited 3D

DWF – lightweight – one way – not BIM

RVT – highly proprietary – BIM

NWD – single file Navisworks

NWF – links – proprietary

Proprietary BIM Formats – Others

PLN – Graphisoft ArchiCAD

GRAPHISOFT®

- claimed first BIM format (1987)

DGN – Bentley MicroStation – BIM

- supports OpenDGN with software library

VWX – Nemetscheck Vectorworks – BIM

3D PDF – one way transfer – not BIM

Open (International) Specifications

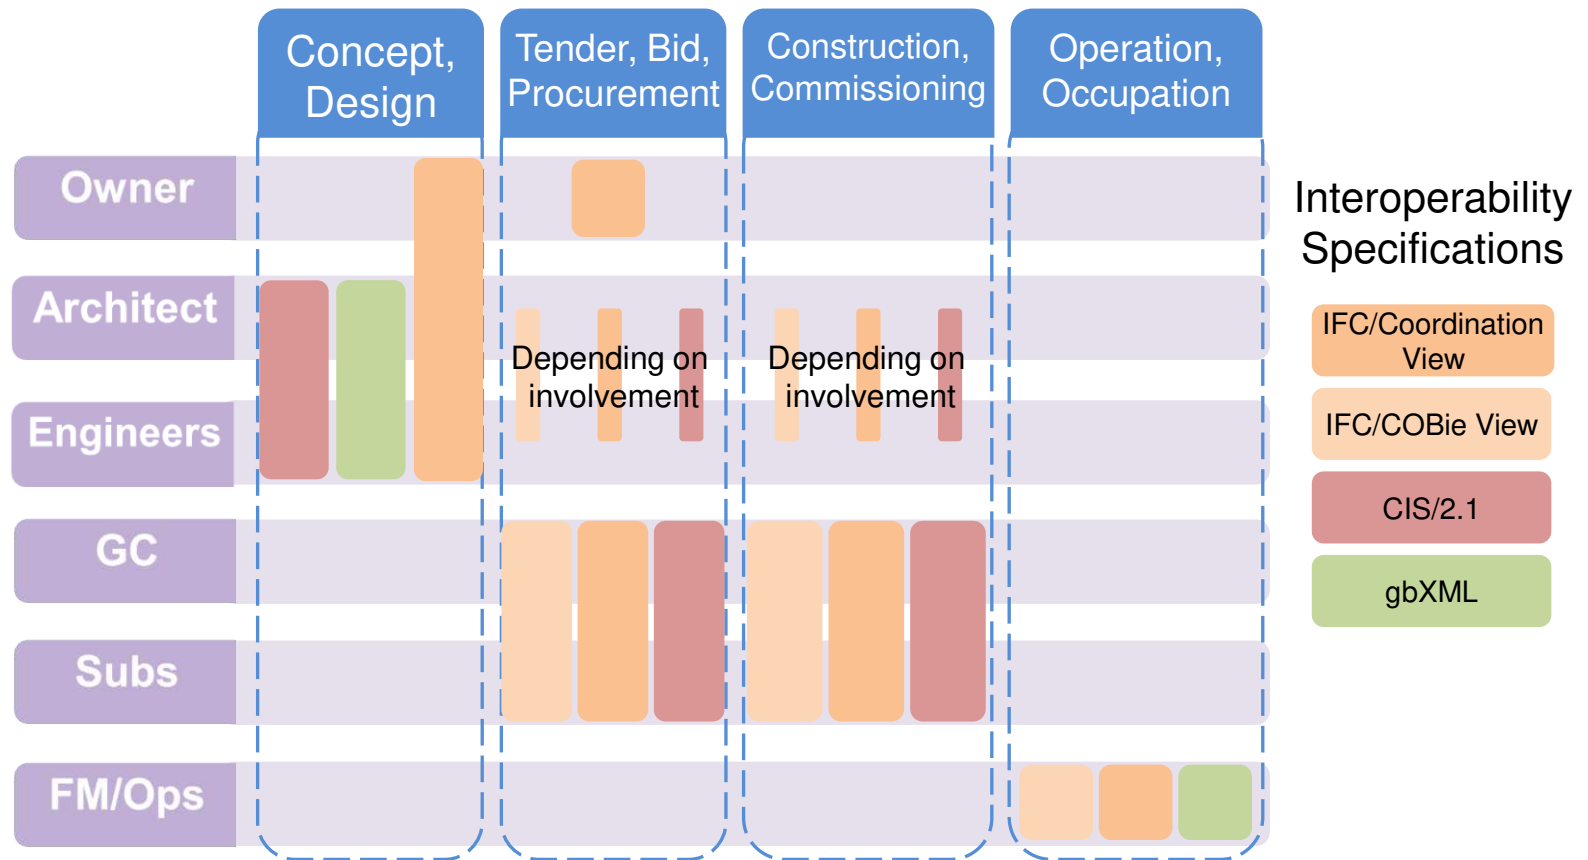

IFC

COBie

gbXML

CIS/2.1

Specification's Relevance in Design-Bid-Build

IFC: Industry Foundation Classes

- Closest to ISO/IS certification
- Currently ISO/PAS 16739
- .ifc files – heavily uses STEP (ISO 10303)
- Fairly comprehensive: building elements, spaces, ...
- Certification 2.0 program for implementations of stable version IFC2x3
- IFC2x4 final release 2Q – plan IS by Q3

IFC Continued

- Interrelated **Objects** with globally unique identifiers
- Database compatible – tracking/control modifications
- Model View Definitions – legal subsets of data

Two common IFC2x3 Model View Definitions:

- **Coordination View** – design & construction
- **Basic FM Hand Over** – construction & operator

IFC Adopters

- Finland (Senate) 2007,
Norway (Statsbygg) 2007,
Denmark (DEACA) 2009,
Singapore 1997 permits, ...
- USA:
 - GSA (2007+) major projects spatial BIM (IFC2x2)
 - Universities (Penn State, Arizona State, Emory University Atlanta, ...)
 - U.S. Army, NASA
- Canada: Alberta, B.C., Montreal (city), ...

IFC Coordination View

When: Design through Hand Over, Retrofits

What: Coordination, Clashes, Planning, Material,...

Who: Owner, AEC, Subs, Operator

Pros: Free viewers, broad support

Limitations: Fabrication Steel & MEP, LOD, scheduling, ...

IFC Facility Management Handover

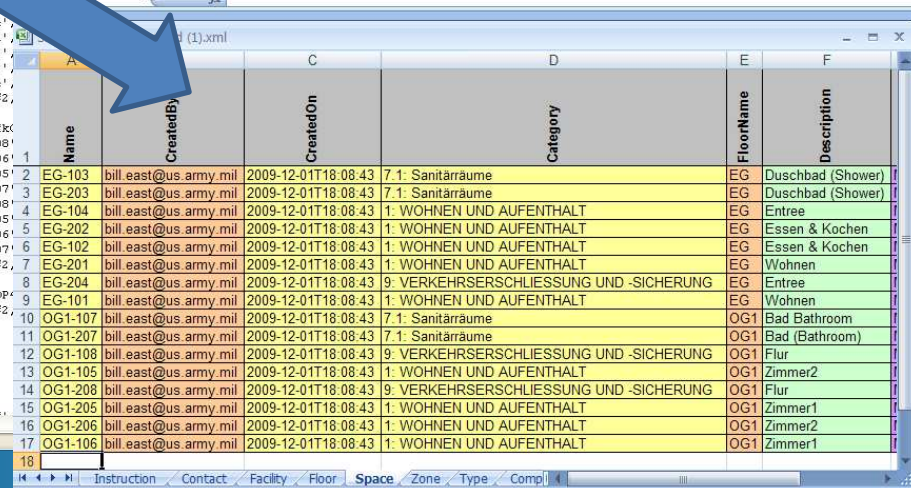

Scope: “Handover from planning and design applications and construction and commissioning software to CAFM and CMMS applications” ← building life-cycle link

Specific subset of IFC – an MVD – .ifc file

Construction-Operations Building Information Exchange (COBie)

COBie 2.3 (Jan 2011) defines a two-way mapping to a multi-sheet spreadsheet

- No special/expensive software to edit/read
- Contractors add data as systems installed/commissioned

IFC Hand Over / COBie

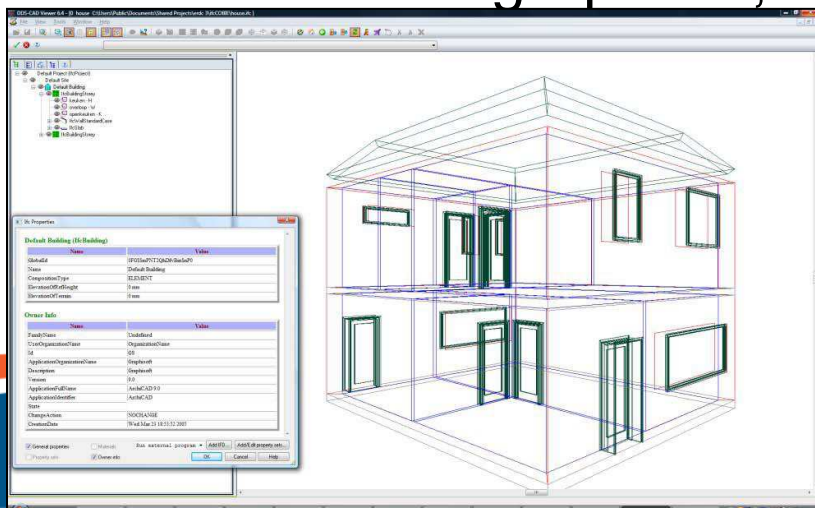

When: Procurement, Construction, Commissioning, Hand Over, Retrofits

What: MEP, equipment lists, warranties, coordinates., ...

Who: Sub-contractors, FM, Operators

Pros: Growing support, backed by US Army Corp Engineers and NASA, easy to use

Limitations: not graphical, support still growing

COBie Supporters

CIMsteel Integration Standards Release 2 (2003) – CIS/2.1

- Steel Construction Institute (UK)
- Endorsed by the American Institute of Steel Construction (US)
- Design, analysis, detailing and fabrication processes vertically in structural steelwork industry
- Like IFC based on STEP (ISO 10303)
- On-going effort to harmonize with IFC
- Older, established standard

CIS/2.1

When: Entire structural steel design, fab, erection cycle

What: Design, detailing and fabrication data...

Who: Structural steel sector

Pros: Established, comprehensive US standard

Limitations: only for structural steel

gbXML: green building XML

- Initially bridge model to DOE tools
- Mostly for energy and comfort modelling
- Non-profit controlled targeting sustainable building solutions in design, ops and re-cycling

When: Design & Analysis, Operations

What: Space/Zone geometry, systems

Who: Designers, Analysts, FM, Operators

Limitations: Changing rapidly, small scope

gbXML Supporters

- Artifice – DesignWorkshop
- Autodesk – AutoCad, Revit, Green Building Studio, Ecotect
- Bentley – Architecture, Mech. Systems, speedikon, Hevacomp
- Cadsoft – Envisioneer
- Onuma – BIMStorm
- Arup – EnergySave
- blueCape – OpenFOAM
- CADLine – Cymap
- DesignBuilder – v2
- ...
- <http://www.gbxml.org/software.php>

3C Technology

Federated Model Tools
Model Servers

Some Federated Model Tools

Solibri Model Viewer – .ifc

Tekla BIMsight – .ifc, .ifcxml, .ifczip, .dwg, .dgn, .xml (Tekla Web Viewer files)

Navisworks Freedom – .nwd, 3D .dwf

Vectorworks – .dxf, .dwg, .kml (Google Earth), .3ds, SketchUp

Navisworks – .dxf, .dwg, .dgn, .dwf, .3ds, CIS/2, .ifc

Innovaya – as a plug-in (big three)

Model / File Servers

Support multiple users, multiple tools, multiple locations.
Database like access & control & backup

Examples:

BIMServer (bimserver.org)

- internal .ifc, merge, revisions, change finder, database like query & filter, open source or commercial

Onuma Model Server (Onuma, BIMStorm)

- .ifc internal, BIMXML plug-in (big three), element level access, cloud

Others

- Autodesk Buzzsaw

, ...

Summary

Interoperability – Communication, Collaboration & Cooperation

- Shared models – no re-keying
- Impact: fundamental change in the construction sector
- Not yet transparent, automatic or even necessarily straight forward

Open Specifications – real solutions now

- IFC (COBie), gbxml, CIS/2.1 – rapidly growing support and application
- Improving coverage/completeness/consistent support

Pragmatic

- Team using family of tools with common proprietary format
- Federated Model Tools bridge many mixed tool gaps – some are free
- Model servers support broadest three C level interaction

BIM in use and delivering value now
