This refers to the manuscript entitled (hereinafter the "manuscript"):

Synthesis And Characterization of Macroporous Tin Oxide Composite As An Anode Material For Li-ion Batteries

written by the author(s): ☐ Check if you need more lines to enter all the author names of this manuscript.

Chae-Ho Yim, Elena A. Baranova, Fabrice Courtel, Yaser Abu-Lebdeh, and Isobel Davidson

to be published in:

Journal of Power Sources

1. Definitions

Post-Print (Accepted Manuscript):
The version of a manuscript that has been accepted for publication following peer review. Content and layout follow publisher's submission requirements.

Publisher's PDF (Version of Record):
A fixed version of a Post-Print that has been made available by a publisher. This includes any "early release" article that is formally identified as being published even before the compilation of a volume issue and assignment of associated metadata, as long as it is citable via some permanent identifier(s). This does not include any "early release" article that has not yet been "fixed" by processes that are still to be applied, such as copy-editing, proof corrections, layout, and typesetting.

2. The authors (except those listed in this paragraph) contributed to the manuscript on behalf of the National Research Council of Canada ("NRC"), thereby establishing a copyright belonging to the Crown in Right of Canada, that is, to the Government of Canada. NRC is not able to deal with the rights relating to the contribution of any co-authors listed below, and you should seek their permission separately [*may say* none]. ☐ Check if you need more lines to enter all the author names of this manuscript.

Prof. Elena A. Baranova, Department of Chemical Engineering ,Ottawa University

3. With respect to the Crown's copyright, NRC grants you permission to publish the Publisher's PDF in the publication named above, on the condition that clear attribution is given to the authors and the National Research Council of Canada. After that publication, you may re-publish the Publisher's PDF in any form or medium, with the same condition about attribution.

4. You are hereby [*specify* hereby *or* not] granted the right to license others to copy or publish the Publisher's PDF. For the purposes of clarity, where the right to license others is left blank, the publisher may assume that the right is hereby granted. (If this right is granted, it is subject to the same condition about attribution).

5. NRC, for itself and those authors not listed in section 2, warrants that:
   a. The manuscript is the original work of the named author(s).
   b. A Publisher's PDF has not been published elsewhere and will not be permitted to be published elsewhere, if you accept the manuscript for publication.
   c. The manuscript contains no infringing, libellous or other unlawful statements.

6. NRC retains the following rights, provided that when reproducing the manuscript or extracts from it, the publisher is acknowledged:
   a. To post a copy of the Post-Print on the NRC's website, the author(s)' funding body's designated archive and any other open access digital repository, subject to the embargo period specified herewith: 12 months.
   b. To reproduce the Post-Print for non-commercial purposes including other formats and other forms of expression.
   c. To reproduce the Post-Print for the purpose of education or research by the Government of Canada and to permit other institutions with which the author(s) is affiliated to reproduce the Post-Print for the purpose of education or research.
   d. To reuse figures, tables or an abstract created by the author(s).
   e. To authorize others to make any non-commercial use of the Post-Print so long as the author(s) receives credit as author(s) and the publication in which the Publisher's PDF has been published is linked to the source of publication of the Publisher's PDF (link to the publisher's or journal site).

7. It is believed that this authorization will provide you with all the scope of authority you require from the Government of Canada, but it does NOT transfer the copyright to you.
